

# PrestaShop INSTALLATION GUIDE

## Installation of module Payson Checkout 2.0 for PrestaShop 1.6

Payson Checkout 2.0 is designed to maximize the number of conversions. With our new and fast payment method we have discarded all unnecessary steps in the checkout to increase your sales. The payment window is nicely integrated into your e-shop, where the customers can pay with only one click! Payson Checkout 2.0 also supports sales between companies, "B2B".

The customer can choose to first bring home the goods and then pay afterwards by invoice or partial payment, or to pay the order directly by card, internet bank or by SMS.

Payson Checkout 2.0 has our lowest transaction cost and you avoid fixed fees. Get started fast, within 24 hours when you create an account with BankID!

## Prerequisites

The module is designed for Prestashop 1.6.x and we recommend using the latest stable version for maximum performance.

In this guide, we will configure the module and PrestaShop for One Page Checkout.

We use the PrestaShop standard theme with the language Swedish and the currency SEK installed.

## Download

Download the module here: <https://github.com/PaysonAB/Payson-Checkout2-Prestashop/raw/master/paysonCheckout2.zip> and save it on your computer.

## Installation

1. Log in to your e-shop as an administrator (SuperAdmin).
2. Click on "Modules and services" in the menu.
3. Click on "Add a new module" in the right corner.
4. Click on "Select a file" in the box that appears and select the downloaded file `paysonCheckout2.zip`.
5. Click on "Upload this module".

Once the module is uploaded, it will appear in the list.

1. Click on "Install".
2. If a note appears, click on "Continue with the installation".

Now the module configuration is displayed.

## Configuration

### ● Mode

In "Test Mode" no Agent ID or API key needs to be specified, which makes it quick and easy to test the installation.

In "Production Mode", the Agent ID and API key need to be specified. To further test the installation, we recommend first creating a Test Agent,

**<https://test-www.payson.se/TestAccount/Create>.**

With the Test Agent's Agent ID and API key, transactions and logs are created at **<https://test-www.payson.se>** so that the installation can be tested.

Once the installation is tested, it's time to enter the store's Agent ID and API key. Open a Payson account, **<https://account.payson.se/account/create?type=b>** to create the store's Agent ID and API key.

### ● Agent ID

An Agent ID is retrieved by creating a Test Agent or opening a Payson account.

### ● API key

An API key is retrieved by creating a Test Agent or opening a Payson account.

- **Payson Checkout 2.0 receipt page for all customers**

To view the Payson Checkout 2.0 receipt page after a purchase, set to "Yes".  
To view the store's default page after purchase for logged in customers, set to "No".

- **One Page Checkout**

Indicates whether Payson Checkout 2.0 should be displayed immediately at checkout or in the next step, we set it to "Yes".

- **Mandatory BankID**

Set "Yes" to make BankID mandatory when identifying customers.

- **Theme**

Choose which theme Payson Checkout 2.0 should use.

- **Log**

Set "Yes" to log Payson Checkout 2.0 messages in PrestaShop logs. It may be useful in test mode or if any problems occur.

Click "Save Settings to complete the configuration of the module.

## **Configuration PrestaShop**

Click "Settings → Orders" in the menu, here we put "Order process type" to "One Page at Checkout" and "Enable guest checkout" to "Yes".

## **Customer information for conducting test purchase**
