

## INSTALLATION GUIDE

### Payson Checkout 2.0 for PrestaShop 1.6

Payson Checkout 2.0 is designed for maximum conversion. In our new and fast payment solution, we have lost all unnecessary steps at the checkout to increase your sales. The payment window is nicely integrated into your e-shop where customers can easily complete the purchase in just a few clicks! The solution also supports sales between companies, "B2B".

The customer can choose to get home the item and subsequently pay for invoice or partial payment, or to pay the order directly with card or internet bank.

Payson Checkout 2.0 has our lowest transaction cost and you do not get any fixed fees. Get started quickly, within 24 hours when you create an account with BankID!

### Conditions

The module is developed for PrestaShop 1.6.x and we recommend using the latest stable version for maximum performance.

We use PrestaShop standard themes with the language Svenska and the currency SEK installed. The module supports SEK and EUR.

### Download

Download the module <https://github.com/PaysonAB/PaysonCheckout2-Prestashop-1-6/raw/master/paysoncheckout2.zip> and save it to your computer.

## Installation

1. Log in to the store as an administrator.
2. Click on "Modules and services" in the menu.
3. Click on "Add a new module" in the right corner.
4. Click on "Select a file" in the box that appears and select the downloaded file `paysonCheckout2.zip`.
5. Click on "Upload this module".

Once the module is uploaded, it will appear in the list.

1. Click on "Install".
2. If a note appears, click on "Continue with the installation". Now the module configuration is displayed.

## Configuration

### • Mode

In "Test Mode", no Agent ID or API key needs to be specified, making it quick and easy to test the installation.

With a Test Agent Agent ID and API Key, transactions and logs are created at <https://test-www.payson.com> so that the installation can be tested further. Set a Test Agent here: <https://test-www.payson.se/TestAccount/Create>

To use the Test Agent data leave "Test Mode" set to "Yes" and fill in the TestAgent ID and API key for TestAgent.

Once the installation is tested, it's time to enter the store's Agent ID and API key. Open a Payson Account, <https://account.payson.se/account/create/?type=b> to create the Store's Agent ID and API Key.

In "Production Mode", the Agent ID and API key need to be specified.

### • Agent ID

An Agent ID is retrieved by opening a PaysonAccount.

### • API-key

An API key is retrieved by opening a PaysonAccount.

### • TestAgent ID

A TestAgent ID is retrieved by creating a TestAgent.

- **TestAgent API-key**

A TestAgent API Key is retrieved by creating a Test Agent.

- **Order Status for Canceled Orders**

Select at which order status a payment will be canceled at Payson.

- **Order status Sent orders**

Select at which order status as a payment to be marked as sent to Payson.

## **Order Processing**

The module has the option of automatically updating a payment at Payson when an order is updated in the store.

You can activate or cancel a payment at Payson. Currently, it is not possible to credit a payment automatically.

Select at which order status an update will be sent to Payson.

Select "Do not send updated order status" to disable the feature.

## **Enable a payment**

Select the order to be activated from the order list in PrestaShop.

Change order status to the one selected in the module settings, such as "Sent". Click "Update Status".

Payment at Payson now receives status "Items have been sent" and the customer is notified.

## **Cancel a payment**

Select the order to be canceled from the order list in PrestaShop.

Change order status to the one selected in the module settings, such as "Canceled". Click "Update Status".

Payment at Payson now receives status "Canceled".

- **BankID**

Set "Yes" to make BankID mandatory when identifying customers.

- **Theme**

Choose which theme Payson Checkout 2.0 should use.

- **Log messagees**

Set "Yes" to log Payson Checkout 2.0 messages in PrestaShop logs. It may be useful in test mode or if any problems occur.

Click "Save" to complete the configuration of the module.

## **Configuration PrestaShop**

Click "Settings Orders" in the menu, here we put "Order process type" to "One Page at Checkout" and "Enable guest checkout" to "Yes".
